WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

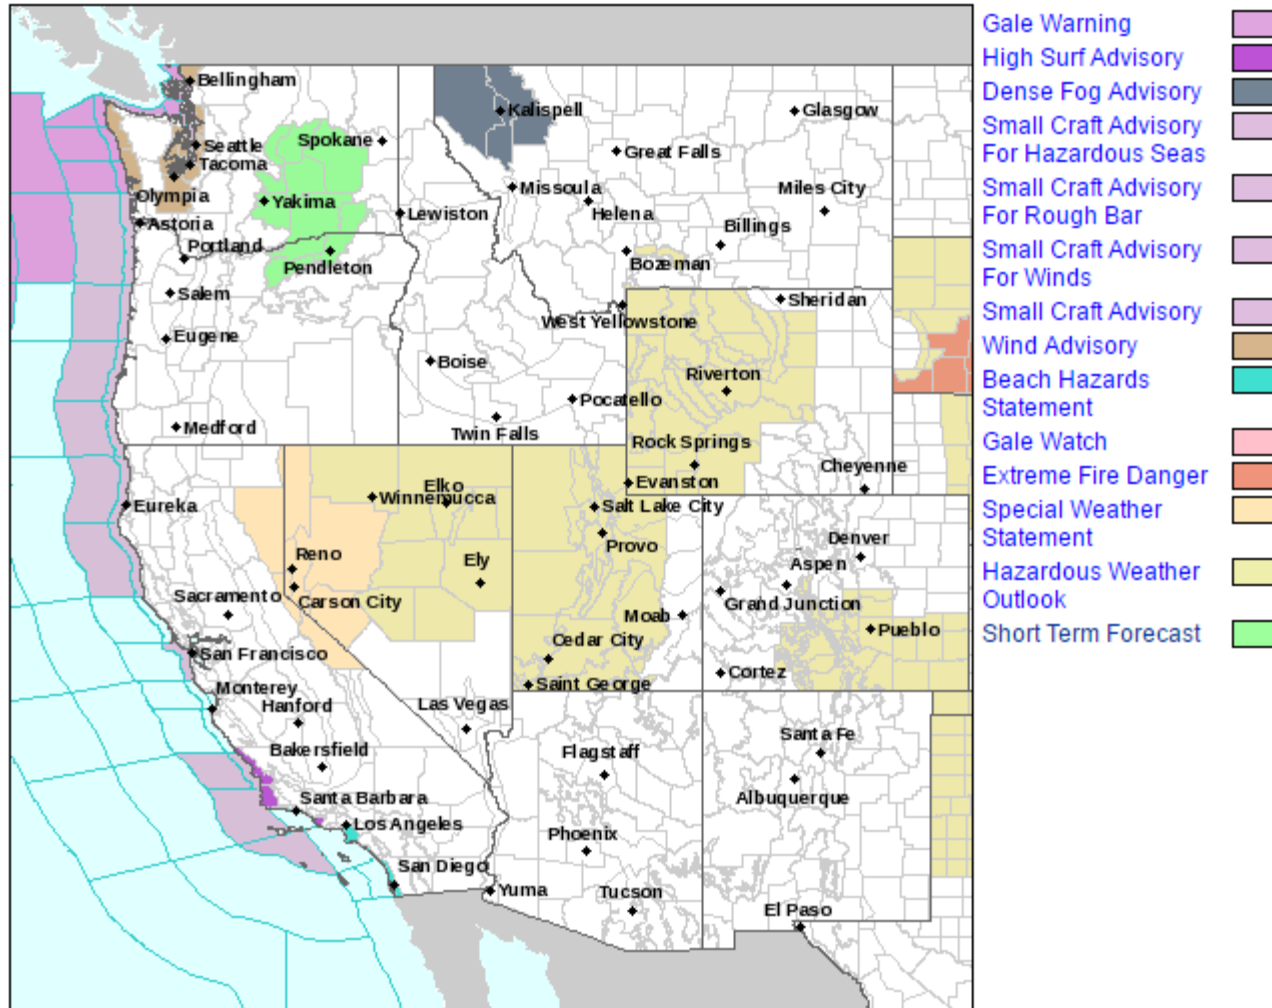

A few showers are persisting along and just off the Del Norte and Humboldt coasts. These showers will gradually dissipate through the day as upper level ridging develops over the west coast. Scattered showers will continue this morning across Northern California. Otherwise dry weather is expected through Monday. A system will move through the area later Tuesday into Wednesday, bringing a chance for rain and mountain snow. High pressure will build in over the state Sunday and Monday with a warming and drying trend. Clouds will begin to increase Tuesday ahead of the next pacific front that will bring a chance of light rain Tuesday night into Wednesday but mainly for the north bay.

SOUTHERN CALIFORNIA

The ridge of high pressure will continue to weaken bringing around 5 degrees of cooling today, with 60s to low 70s across the mountains and mid 70s to mid 80s in the valleys. Temperatures will warm a few degrees as the ridge of high pressure becomes strong both Sunday and Monday. The ridge will weaken once again bringing a little cooling to the area Tuesday. Even though temperatures will go up and down a few degrees through Tuesday, they will be 10 to 20 degrees above normal through the period. Minimum humidity will be mainly between 15% and 30% this weekend and then drop to 12% to 25% early next week. Winds will be light through Tuesday morning. Significant cooling and much higher humidity will take place Wednesday as a Pacific trough moves inland across the West Coast. This trough will also bring westerly winds of 20 to 30 mph with gusts to 50 mph to the mountain ridges and desert passes Tuesday evening through Wednesday evening. Scattered showers with light rain all totals will be possible across Central California during the day on Wednesday. A weak ridge of high pressure will build into California from the Pacific Ocean bringing a slow warming trend and low humidity to the region late next week. Strong north winds will surface across the South Coast of Santa Barbara and the Grapevine Wednesday evening through Thursday morning.
